Fall in love with your movie collection all over again with the XD-E500. The XD-E500 not only upconverts standard DVD up to 1080p to match the resolution of your HDTV, but also enhances your viewing experience thanks to three user selectable modes: *Sharp* for added edge detail, *Color* for richer blues and greens, and *Contrast* for enhancement of details in darker scenes.

PRELIMINARY

XD-E500 Upconverting 1080p Extended Detail DVD Player - PRELIMINARY

- Upconversion up to 1080p/24 frames per second produces amazing video quality, great for rediscovering your favorite DVDs.

- 3 Picture Enhancement Modes:
    - *Sharp* for added edge detail
    - *Color* for richer blues and greens
    - *Contrast* for enhancement of details in darker scenes

- HDMI™ is a convenient, single cable AV connection. It transfers digital video and multi-channel audio to compatible home theater components and high definition televisions without scaling down or compressing the signal, preserving sound and picture quality.

PRODUCT & PACKAGING

Unit Dimensions (WHD) in.	16.93 x 1.97 x 7.80
Carton Dimensions (WHD) in.	18.98 x 4.25 x 10.83
Unit Weight	3.5 lbs
Carton Weight	5.5 lbs
UPC Code	022265001912
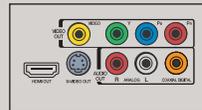

This product does not play HD DVD or Blu-Ray discs. It upconverts standard definition (480p) DVD content to HD (720p, 1080i or 1080p) to match the resolution of your HD display. Although near the picture quality, it does not produce or output native HD video content.

To display upconverted 720p, 1080i or 1080p video content, a 720p, 1080i or 1080p capable HDTV or HD Monitor (as applicable) with an HDCP capable HDMI™ or DVI input is required.

The effect of enhancements may vary depending upon disc content quality and display device capability/functionality/settings. Depending on the quality of the DVD disc, some video noise may be visible.

Some DVD-R/DVD-RW discs may be incompatible due to laser pick up and disc design. Some recordable media or recording formats may not be supported.

Compatibility with other HDMI™-CEC products will vary by manufacturer. Some products will not be compatible at all or may only allow for limited functions.

Viewing 24 frames per second requires content created in 480p / 24 frames/sec and an HD display capable of accepting a 1080p/24 Hz signal.
